Education

Master of Science in Computer Science, Savitribai Phule Pune University, Maharashtra, India.

Bachelor of Computer Science, Savitribai Phule Pune University, Maharashtra, India.

Technical Skills

Category	Skills
Programming Languages	JAVA, PHP, VB .Net
Technologies	ReactJS, SOAP, HTML5, Ajax, JavaScript, jQuery, XML/XSL
BI Tools	Microsoft Power BI
Databases	SQL, MySQL, PostgreSQL
Cloud Environments	Microsoft Azure
Version Control Tools	GIT, SVN
Container Tools	Docker, Kubernetes

Professional Experience

April 2019 – Till Date   Data Innovation Technologies Pvt Ltd

Role :   **Principal Architect and Scrum Master – SimpleAccounts**

Project I   **SimpleAccounts**

Description   SimpleAccounts is a dynamic and innovative accounting firm based in the UAE, specializing in providing user-friendly and efficient accounting software solutions for thriving businesses. SimpleAccounts has made groundbreaking advancements by introducing a pioneering triple accounting system incorporating Blockchain technology.

Technologies   JAVA, React JS, Microsoft Azure, Kubernetes, Docker, GIT, PL/SQL

Roles & Responsibilities:
- Demonstrated effective team management skills, guiding and motivating team members towards successful project outcomes.
- Successfully managed and maintained Kubernetes clusters on the **Azure platform**, ensuring smooth operation and efficient resource utilization.
- Worked closely with the presales team, conducting product demos to showcase features and benefits to potential clients.
- Actively participated in the social media team, providing valuable product insights and content for marketing purposes.
- Developed and implemented backend APIs and modules, ensuring robust functionality and seamless integration with other systems.

- Skillfully integrated frontend user interfaces with APIs, creating cohesive and user-friendly experiences for end-users.

Project II   **(Client: AXA KSA– Remote work)**

Role :   **Project Coordination & Lead (MDM Solution)**

Description   Master Data Management solution capable of providing a 360 view of the Customer. Provided a solution that helps build golden records i.e. Clean, Match and Merge data to develop the master data and provide it to consuming systems. This solution integrates well with existing systems in the wider ecosystem.

Technologies   Master Data Management Suite HMDM

Roles & Responsibilities:

- Assisting in project planning, defining project scope, objectives, deliverables, and timelines.
- Ensured seamless coordination and communication among Client & team members for task assignments and deadlines.
- Providing regular status reports and updates for stakeholders, highlighting project milestones, risks, and achievements.
- Identify project risks and work with the team to develop risk mitigation strategies.
- Maintaining project documentation, including meeting minutes, action items, and project-related data.
- Overseeing the quality of project deliverables, ensuring they meet the required standards.
- Engaging with stakeholders to understand their requirements and expectations throughout the project lifecycle.

Project III   **(Client: AXA UAE– Remote work)**

Role :   **Team Lead & ETL Developer**

Roles & Responsibilities:

- Demonstrated strong skills in effectively managing and leading teams to achieve project goals and deliver exceptional results.
- Proficiently translated complex business requirements into clear and concise technical specifications for efficient implementation.
- Designed, built, deployed, and maintained robust SSIS packages, ensuring seamless data integration and processing.
- Conducted thorough unit testing and troubleshooting to identify and resolve issues, ensuring high-quality and reliable software functionality.
- Developed, updated, and maintained comprehensive technical documentation, providing clear guidelines and references for seamless system understanding and future maintenance.

Project IV   **Sanlam Insurance**

Role :   **Team Lead & BI Developer/Lead**

Roles & Responsibilities:

- Spearheaded client management and team management endeavors, ensuring successful project delivery and fostering a collaborative work environment.
- Translated complex business requirements into precise technical specifications, laying the foundation for efficient and effective solution development.
- Designed, developed, and deployed cutting-edge BI solutions, encompassing robust reporting tools, to empower data-driven decision-making.
- Maintained and supported existing data analytics platforms, optimizing their performance and ensuring seamless functionality.
- Showcased hands-on expertise in maintaining SASS cubes, contributing to the smooth operation of data storage and retrieval systems.
- Evaluated and improved existing Power BI reports for enhanced performance and usability.

- Collaborated seamlessly with cross-functional teams, facilitating seamless integration of systems and promoting synergy across departments.
- Diligently created, updated, and maintained comprehensive technical documentation, serving as a valuable resource for future reference and system understanding.

June 2015 – March 2019   MyFatoorah (Kuwait)

Role :   **Senior Developer – VB.NET**

Project   **Myfatoorah (Client Side)**

Description   Myfatoorah is a comprehensive online payment solution integrated with e-commerce functionality. This platform offers API integration to clients, enabling them to facilitate payments through our secure gateway, similar to traditional banking services. Additionally, Myfatoorah extends its services to other service providers, allowing them to generate invoices for the services they offer to their customers via the Myfatoorah platform. Convenient SMS links and email facilities are provided to customers, enabling them to make payments effortlessly via both mobile and web platforms.

Technologies   VB.Net, SQL, jQuery, Wordpress, SQL

Roles & Responsibilities:

- Played a key role as a core developer in software development projects.

- Successfully managed website operations and maintenance.

- Efficiently resolved bugs and issues to ensure smooth functioning of the software.

- Contributed to backend development tasks, ensuring robust and efficient system functionality.

- Demonstrated expertise in UI development, creating intuitive and visually appealing user interfaces.

- Proficiently generated reports to provide valuable insights and analytics for informed decision-making.

Role :   **Senior Developer & Product Lead - PHP**

Project   **Formations Kingdom**

Description   Formations Kingdom is a cutting-edge company registration website that serves as an interface between Companies House (Govt. portal) and users. It revolutionizes the company registration process by enabling new companies to be registered in just 3 hours.

Technologies   PHP, AJAX, jQuery, High Charts, MySQL

Framework   CodeIgniter

Roles & Responsibilities:

- Actively participated in all phases of project delivery, ensuring successful completion from inception to deployment.

- Skillfully handled database operations and design architecture to ensure optimal performance and scalability.

- Effectively communicated with clients to understand their requirements, address concerns, and provide updates on project progress.

- Efficiently assigned tasks to team members, ensuring proper utilization of skills and timely project delivery.

- Prepared accurate estimation reports for new projects and project edits, providing clear timelines and resource requirements for effective project planning.

I hereby declare that the information furnished above is true to the best of my knowledge.
